Tutoring

Help is available
when they need it
the most.

We have provided private tutoring services to Florida students for the past 5-years. But did you know that we have tutors available to all the top college campuses in Florida as well?

Review some of our Active tutors available to help your students today, tomorrow, and in the near future. For a list of available tutors in your college of choice please contact us Toll-free 866-358-8867, visit our [website](#), or email kearneyt@tutorselect.com to learn more about our services.

Noah - Tallahassee

I received my BS degree in Math Education in Spring of 2001 at Florida State University. While at FSU I worked in the Math Help Center for three months. I taught math for two years and decided to choose a different career path in Actuarial Mathematics. I am currently finishing my master's degree at Florida State University. For two years I tutored math at all levels at Sylvan Learning Center in Tallahassee. In that time I learned different things related to presenting the math in a way that can be understood regardless of the level of the student. Mostly I focus on explaining the most important steps of a particular skill and then guiding the student to developing their understanding of that skill.

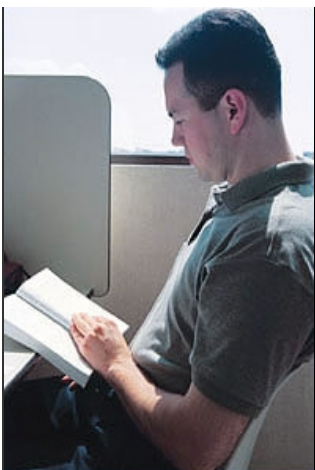

Lindsey - Gainesville

I attended Columbia University in New York City, graduating in three years with my BA in English. There, my passion for books and writing reached new heights--and, I realized I wanted to share my passion with others through teaching and tutoring. Columbia's core curriculum also gave me the chance to pursue other academic interests, such as calculus, chemistry, social psychology, music and art humanities, and Eastern cultures. I attained my secondary teaching certification last December and gained valuable experience working with students in the classroom as a mentor and student teacher. In addition, I have worked as a substitute teacher, summer camp counselor and director, and girls basketball coach in the past four years.

Jeff - Tampa

I have earned a BS in Engineering, which gave me significant insights into Math and the Physical Sciences. Between 1984 and 1989, I had significant tutoring experience physics, mathematics (all levels up to 12th grade), chemistry and French. I developed numerous tests and study aids, and was often called upon for numerous assignments, especially when others in the organization did not perform well. I passed a four part, three hour exam in French. I have also been heavily involved with the Engineer In Residence program in Canada, providing engineering, science and technology help, and guidance to students between 4th and 8th grades.

If you would like to arrange a prepaid account, giving your student the freedom to choose a tutor whenever they need someone, please contact an Eeducational Counselor toll-free 866-358-8867

Our services include:

1. paper editing
2. test prep
3. lab assistance
4. coursework assistance

We are currently offering our services in Florida, Georgia, Tennessee, North Carolina, Colorado, Arizona, Nevada, and Washington.

Coming later this year, we will be available in Utah and Minnesota.

Bronson - Boca Raton

I have a B.S. in Chemistry from the University of Florida. I earned a 3.73 overall GPA and graduated with a Magna Cum Laude honor. During my chemistry program, I studied mathematics and chemistry extensively. Thus, I feel that I am proficient in college chemistry I/II and mathematics through Calculus I. I also had adequate exposure to Biology, Physics, and Biochemistry/Molecular Biology. As a student at Broward Community College, I worked as a mathematics tutor for nearly a year. Similarly, I worked at the University of Florida as a science tutor for nearly a year. Both these positions gave me the experience needed to teach different students the same concept in different ways (i.e., visually, etc...). During the past year, I have been tutoring my sister in college mathematics.

Jessica - Miami

Ambitious and inquisitive, achievement in the academic arena has always been a priority of mine, as I constantly strive to broaden my educational horizons. After earning a B.S. in Physiological Science in three years, I went on to receive an M. S. in Biomedical Engineering with a specialization in Molecular and Cellular Bioengineering the following year. I am currently in my first year in the combined M.D./Ph.D. program at the University of Miami Miller School of Medicine, and as an aspiring physician-scientist, I have had a plethora of opportunities to cultivate skills that are applicable across disciplines, such as problem-solving approaches and critical reading/writing techniques. Over the past nine years, I have been tutoring students in various stages of their education (from grade school to college and beyond) in a number of academic subjects, including English, mathematics, the sciences, humanities, and Spanish.

Randy - Orlando

I have a broad background as an educator. My years in the classroom as both an English teacher and an assistant principal have given me a unique perspective in both curriculum and the needs of the individual student. Following my public school years, I have taught freshman English composition at a local community college as well as served as a tutor to middle and high school students. I have enjoyed guiding students in improving their writing and analytical skills. I am also excited by the advantages of using the Internet as a teaching tool to a generation of technology-savvy students.

Jennifer - Jacksonville

As a physics graduate student at Ohio State, I taught the recitation sessions for an introductory physics class. This involved preparing problems and solutions and leading the students through the process in class. I was selected to team teach a physics by inquiry class. This class is completely hands on, and as a teacher for this class, I worked individually with the students as they worked through the experiments. As an undergraduate student at Ripon College, I tutored other students in various math and physics courses. I also have many years of successful unofficial tutoring experience with my younger sister, who is not a math person. I believe that I am very successful with one-on-one teaching, and I would love to help students in science and math.

Sandra - Clearwater

My classroom teaching experience includes teaching math (2nd grade through Algebra II) and science (2nd grade through community college); assigning and evaluating core academic lessons from Kindergarten through High School in both public and private homeschool programs. In addition, I have tutored numerous public school children in math and science. I feel I am uniquely qualified for tutoring due to my extensive experience serving independent study (i.e., homeschooled) students. For six years, I have facilitated the education of hundreds of students through the assignment and evaluation of coursework in all subject areas and all grade levels. I have expertise in curriculum options and creating assignments that match the students individualized educational goals, as well as meeting district guidelines.

Did your student decide to leave Florida for college? You can also find our tutors available:
